<b>Usability and Support</b>		
Centrally installed on a server and runs in a browser so the Inventory management can be conducted globally. Access the software from a mobile device, from Home, or while traveling.	<b>X</b>	<b>X</b>
Immediately up to date. Since the system uses one central database , all transactions occur live. Mobile device transactions are live as well.	<b>X</b>	<b>X</b>
SQL server database allows customers to create adhoc reports in any tool that can connect to SQL Server.	<b>X</b>	<b>X</b>
All screens follow a common theme to make the software simple and intuitive.	<b>X</b>	<b>X</b>
Scalability is only limited by the server's capability. Currently deployed in environments supporting over 1000 users.	<b>X</b>	<b>X</b>
Can be integrated with other applications.	<b>X</b>	<b>X</b>
Can be hosted on many opperating systems ranging from Windows XP to Windows 2008 server R2 64 bit	<b>X</b>	<b>X</b>
Install it on your server , or off site. Accuware can optionally provide hosting pricing as well for quick deployment	<b>X</b>	<b>X</b>
Supported by personell in the USA, and is readily available by phone.	<b>X</b>	<b>X</b>
Software is priced for you to own the software. (not Software as a service) .	<b>X</b>	<b>X</b>
